SEARCH NOTES		
Search Notes	Date	Examiner
Reviewed the entire paper contents of paper parent application file, 08/702,011. In view of the fact that the parent case was filed in 8/1996, and the fact that the parent case has several thorough STN searches (one done by STIC), a new NPL search in this application was not deemed to be likely to turn up any more relevant PRIOR art. If any new prior art that has a good date were to be newly available, it would only be as a patent document that would be found in EAST or WEST.	7/07	JP
Inventor name searched	7/07	JP
EAST search. Files USPAT, PGPUG. See Printout.	6/07	JP
WEST search. Files USPT, PGPB, DERWENT. See Printout.	8/07	JP
